**Meat & fish analogues**

**Great binding properties**

**PLANT  
BASED**  
COMPETENCE  
CENTER

Consumer wishes for healthy food and easy eating occasions are paving the way for the convenience trend. This demand is driven by Millennials' fast-paced lifestyle, and by consumers who are aware of the consequences of their food choices. With the growth of the plant-based convenience sector and the demand for familiar textures, manufacturers need to develop new products. Planteneers' plant-based portfolio is constantly expanding with the **fiildFish P** and **fiild Meat P** range of binders, which makes it possible to produce palatable alternatives to fish fingers, chicken nuggets and filets. This product range features a modular approach, in which an end product can be developed by combining each binder with a suitable texturate, colouring and flavouring.

<b>Binder</b>	<b>Proteinsource</b>	<b>Properties</b>
fiildMeat P 121104 <i>Art. No. 10010513</i>	Wheat & soy	For economic filets and nuggets, with soy or wheat TVP
